MAT IN PLUMAS COUNTY

If you use heroin or other opioids and would like to stop using them without a painful withdrawal, medication-assisted treatment (MAT) can help. MAT is the use of FDA-approved medications, often in combination with counseling and behavioral therapies, to provide a "whole-patient" approach to the treatment of opioid addiction. The medications used for MAT relieve the withdrawal symptoms and psychological cravings that cause chemical imbalances in the body.

An ounce of prevention is the best form of fire protection.

Follow these preventive measures to help protect your home and family against fire hazards:

- Make sure kitchen items that can catch fire easily, such as paper towels and curtains, are kept away from the stove.
- Keep heating surfaces in the kitchen clean to avoid grease fires.
- Make sure all appliance cords and extension cords are in good condition and that none of your electrical outlets are overloaded.
- Have your chimney and furnace inspected and cleaned before the heating season begins.
- Keep portable heaters at least three feet away from flammable items and make sure they are turned off before going to bed.
- Check smoke detectors every month and change detectors' batteries every year.
- Plan a fire escape route with at least two exits and practice the drill with your family.
